## Dr. Glen Gilchrist Joins NEXX Systems as Manager, Process Integration

Billerica, MA – October 12, 2009 NEXX Systems today announced that Dr. Glen Gilchrist has joined the company to coordinate the practices and capabilities of NEXX process integration engineers and application engineers worldwide.

Dr. Gilchrist comes to NEXX with more than 20 years of experience, most recently as senior systems engineer at Axcelis Technologies and laboratory manager at SemEquip Corporation. In addition, he brings to NEXX leadership abilities in project management and interdisciplinary team building.

Tom Walsh, NEXX CEO, added, "Glen is a dynamic addition to the NEXX team. His management skills and technical breadth will address the rapidly growing demands from our customer base for process qualifications. In addition, he will be responsible for implementing and coordinating process integration at customer sites."

**About NEXX:** NEXX Systems, a leading provider of processing equipment for advanced wafer-level packaging applications, brings exceptional technical expertise to the flip chip and advanced packaging markets. Our product lines provide the most efficient, yet affordable, systems of their kind: Stratus for high throughput electroplating of metals, and Apollo and Nimbus for multi-layer sputter deposition of metals.
