### **NEXX Systems Announces Organizational Changes and Opening of Taiwan Office**

**Billerica, MA – July 16, 2007** – NEXX Systems, a leading provider of processing equipment for advanced wafer-level packaging applications, today announced that it has established a direct office in Taiwan and has named Simon Lee as Taiwan General Manager. During the next three months, NEXX will be working with its current distributor, Seki Technotron, to make a smooth transition of both customer accounts and personnel. In addition to strengthening our presence in Taiwan, NEXX is building out its sales organization with the hire of Brian Kim as Sales Manager, Korea, and Mark Welsh as Manager for U.S. Sales.

Stated Richard Post, CEO, "We are delighted to announce this strengthening of our sales and service organizations in Taiwan and the U.S. to better serve both our current customers, as well as to enhance our opportunities in the wafer level packaging marketplace. Simon Lee, with his expertise in both the industry and the region, is ideally suited to lead NEXX's growing presence in Asia. The Taiwan office will enable us to work even more closely with our significant customer base in that region." Post added, "We are also pleased to name Brian Kim in the position to oversee sales in Korea. Mark Welsh is well known to our Stratus customers but will now expand his previous role to spearhead all U.S. sales. With our customer base rapidly growing, Brian and Mark will bring additional strength and focus to these regions."

Mr. Lee comes to NEXX with more than 12 years experience at Spirox Corporation where, most recently, he served as Director of Sales.

Mr. Kim comes to NEXX with 20 years experience in the semiconductor industry, including Applied Materials, Millipore, Axcelis, and most recently as country manager of Unaxis Korea.

Mr. Welsh has held product and sales management positions at Brooks Automation, Chelmsford, MA; FSI International in Chaska, MN, Eaton Corporation in Beverly, MA, and SemEquip in North Billerica, MA.

NEXX would like to thank Seki Technotron for its long support in Taiwan and for making an easy transition for our customers.

NEXX Systems brings exceptional technical expertise to flip chip and advanced wafer level packaging. NEXX product lines provide the most efficient, yet affordable, systems of their kind: Nimbus for multi-layer sputter deposition of metals, and Stratus for high throughput electro-deposition of metals.
