Kurt Williams is Named General Manager of Advanced Dry Products

Billerica, MA – June 14, 2010 – NEXX Systems today announced that Kurt Williams has been named General Manager of Advanced Dry Products. Dr. Williams comes to NEXX with a PhD in Materials Science from SUNY Stony Brook and a strong product management background. He has a track record of innovation and success in PVD processing from positions at Veeco Instruments, KLA-Tencor, and Advanced Electron Beams.

"Kurt will have full business responsibility for the Apollo/Nimbus systems. We believe this will enable NEXX to further its leading customer solutions in Dry Products," stated Thomas Walsh, CEO of NEXX Systems. "His PVD processing experience and customer service focus bring additional valuable expertise to the NEXX team."

"I am delighted for the opportunity to lead a team of distinguished scientists," added Dr. Williams. "This is an exciting time in the advanced packaging business and I believe that NEXX gives our customers the process equipment tools they need to establish or maintain their technology leadership."

NEXX Systems brings exceptional technical expertise to flip chip and advanced packaging. Our product lines provide the most efficient, yet affordable, systems of their kind: Apollo for multi-layer sputter deposition of metals, and Stratus for high throughput electro-deposition of metals.
